SMARTSTRUCTURES

A SMART-INFRASTRUCTURE COMPANY

SmartFieldSheet

It Fields Easy!

CONNECT, WIRELESSLY TRANSFER DATA, GENERATE REPORTS IN THE FIELD:

ALL IN REAL-TIME

SmartFieldSheet (SmartDensity App)

streamlines the process of Field Activities and limits it to just a few steps.

The Current practice is time consuming, laborious and consists of several steps, starting from collecting samples, filling out field sheets, scanning the field sheets, emailing to the office, entering data in the systems, QA/QC Approvals, generating reports and then submitting to the client.

SmartFieldSheet (SmartDensity App) streamlines this process and limits to just few steps. First you acquire the Density data from the Density Gauge wirelessly to the App, then straight away the QA/QC approvals, generating the reports and submitting to the client.

SmartDensity is a user-friendly App for your field activities, saving your time, efforts, and money. It stays in sync with the guidelines by the State Authorities like, South Florida Water Management District (SFWMD) and Federal Authorities to help stakeholders approach construction projects and reap the benefits of the efficiency and transparency of e-construction.
